Strata IP Series

IP Series Featurephones

Toshiba's IP series of featurephones provide the same extensive functionality that you would expect in a digital featurephone, allowing users to choose the best device for their circumstances, without compromising on functionality.

Whether working from a main or branch office, or even from home or on the move, the IP series of featurephones from Toshiba are extremely robust and reliable, providing a range of functionality to improve productivity and efficiency for the user.

Key Customer Benefits

- Easy identification of extension status through red/green Busy Lamp Field (BLF) indication.
- Intelligent feature presentation through soft keys, for applications such as voicemail.
- Easy identification of the type of call through 10 different ring tones.
- Specific projects can be assigned a Direct Dial-In (DDI) number with a specific ring tone.
- One-touch keys for regularly used functions such as speed dials, call pick-up etc.
- Multiple message waiting indication allows use of shared mailboxes for specific departments or projects.
- One-touch group pick-up with easy recall of calls placed on hold.
- Reduce time spent searching for numbers with on-screen directory dialling on LCD featurephones.
- Consistent design to the Classic series of featurephones allowing a combination of digital and IP end-points to be used, whilst maintaining the same look and feel.
- Peer-to-peer functionality in pure IP configuration minimises the bandwidth used for internal calls in branch offices, and ensures best possible quality of service for IP telephony.

TOSHIBA
